[1]The values of fuel consumptions, CO2 emissions and energy consumptions shown are determined according to the European Regulation (EC) 715/2007 in the version applicable at the time of type approval. The values shown consider optional equipment and the different size of wheels and tyres available on the selected model and may vary during the configuration.

The values are already based on the new WLTP regulation and are translated back into NEDC-equivalent values in order to ensure the comparison between the vehicles. For the assessment of taxes or other duties based (at least inter alia) on CO2-emissions the CO2 values may differ to the values stated here.

-

[2]The values of fuel consumptions, CO2 emissions and energy consumptions shown are already based on the new WLTP test-cycle and determined according to the European Regulation (EC) 715/2007 in the version applicable at the time of type approval. The values shown consider optional equipment and the different size of wheels and tyres available on the selected model and may vary during the configuration. For vehicle related taxes or other duties based (at least inter alia) on CO2-emissions the CO2 values may differ to the values stated here.
